LITTLE PACKAGE, BIG PERFORMANCE

"We were looking for a Web conferencing solution that would allow our staff to support and train over 2,000 users - without breaking the bank or overwhelming our network with unnecessary features we would never use. TurboMeeting is an appliance that has a very clean and easy interface for setting up, scheduling, and conducting webcasts."
Ken Grimes, Fleetpride

"RHUB and TurboMeeting saves more than the day - literally. It allows us to save gas, trip time and become more efficient by doing remotely what was once not possible."
Pierre Kerbage, Networklogistics

"It was a very simple installation. Following the instructions, it was completely set up in about 15 minutes."
Brian Schulman, Sento

"Our customers want a superior web-conferencing and support experience, so this was our primary consideration. TurboMeeting has a number of features that are fundamental to the customer's experience. It accommodates varying screen sizes automatically, allows mouse sharing easily, provides fast performance with high quality screen rendering, and has many other useful features. TurboMeeting offers quick and simple client installation, as well as a very small download size."
Michael Guess, Persyst Development Corp

" The main thing that drove us to select TurboMeeting was our return on investment – it was a one-time fee that delivered 95% of what we were looking for in an easy to use & stable package. Additionally, a huge factor was that we actually owned the product instead of paying a monthly fee for a hosted service like the competition offers."
Rich Kulka, Simplenet Solutions
