MimioMobile

Get the most out of the mobile devices you already have with the MimioMobile™ application. A single MimioMobile annual license for a teacher's classroom computer lets every student with a device interact with the lesson displayed on the interactive whiteboard.
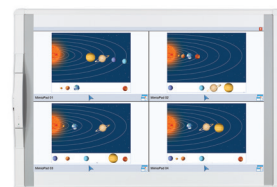

The MimioMobile app lets multiple students simultaneously contribute to the learning environment. Teachers simply link the MimioMobile app to their MimioStudio™ classroom software, and the mobile devices can be used together, Apple and/or Android.

- Allows multiple student devices to work simultaneously on a MimioStudio activity, with everyone's work displayed at the front of the classroom—encouraging collaboration.

- Different device types can be used at the same time: Apple and Android tablets and phones, MimioPad™ wireless pen tablets, and MimioVote™ assessment.

- NEW - Connect up to three mobile devices using the MimioMobile app, free with any MimioStudio license. Connect every mobile device in the classroom with the purchase of just one annual MimioMobile license.

- Students can use their mobile devices for assessment via numeric, short-answer, and short-essay questions.

- Open-ended response questions help students practice for the upcoming Common Core Assessments.

- The MimioMobile app connects with a simple point-and-click to the teacher's MimioStudio software. Just scan the QR code displayed on the whiteboard, and connect instantly.

Key Features

Minimum Software Requirements for Classroom Computer

- MimioStudio 11 software on Windows, Mac, or Linux OS.
- MimioMobile activation code, supplied upon purchase of the MimioMobile annual license, to enable functionality.
- For specific system requirements, please visit mimio.com/support/downloads and select your operating system.

Teacher and Student Modes

- MimioMobile app supports features for both teachers and students.

Teacher Control

- Teacher can control computer desktop.

Teacher Classroom Management

- Teacher can pass control to an active MimioPad tablet or mobile device running the MimioMobile application.
- Teacher can unilaterally retake control.

Student Response/Vote Support

- Allows students to participate in a student response/vote session.
- Students may use any combination of MimioVote handsets and mobile devices running the MimioMobile app.

Student Collaborative Tools

- Students can participate in a collaborative activity.
- Each individual collaboration space shown on the interactive whiteboard is replicated on the respective mobile device, so students don't need to look at the board.
- MimioStudio Collaborate feature works seamlessly with any mix of new MimioPad tablets and mobile devices running the MimioMobile app.

Ease and Security of Connection

- This patent-pending process turns the usually complex and time-consuming process of connecting multiple mobile devices into an instantaneous point-and-click. Just scan the QR code displayed on the whiteboard, and connect instantly.

- Connection is secure and minimal support is required.

Shortcut Keys

- Provides quick access to up to 16 commonly used MimioStudio Tools.
- Uses familiar MimioStudio icons, to shorten the learning curve for teachers and students.

Interoperability

- Works on Apple and Android mobile devices.
- The MimioMobile application can work simultaneously and seamlessly with the new MimioPad and MimioVote hardware.

Languages

- For a complete list of the 33 supported languages, visit us at mimio.com/languages.

Compatible Devices*

- iPad 2 and above
- All versions of the iPad mini
- iPhone 4 and above
- iPod Touch (4th Generation and above).
- Android 3.0 (Honeycomb) or higher.

* For complete device compatibility information, visit mimio.com/mimiomobile.
